modular and mobile buildings - urban temporary roofs

housing + environmental design + st denis 2021

first innovation partnership in construction and housing in france
the aim is to create an urban development model tailored to the needs of the sncf - french national society of railroads.
the challenge is to design a project based on modularity and maximal reversibility of a fleet of prefabricated modules managed by a portage company. the modules can be reused several times and reconfigured with minimum intervention, to create configurations adapted to different programs (housing, offices) and sites.

governing authority

icf habitat - sncf immobilier
territorial bank (caisse des dépôts), saint denis municipality
